Academic Projects
Virtual Fitting Website Using Augmented Reality and Personalized Style Suggestions (Capstone Project)
Jan 2026-Apil 2026

- Designed the complete User Interface (UI) using Figma, including wireframes, layouts, icons, images, and overall visual design.
- Developed the back-end database structure using XAMPP (MySQL), creating and managing database tables, relationships, and user data.
- Planned and organized the system's design flow, screen outlines, and visual assets to ensure a consistent and user-friendly experience.
- Collaborated with the development team by preparing design prototypes and database architecture, supporting the successful implementation of the virtual fitting website.
- Created Data Flow Diagrams (DFD) Level 0, Level 1, and Level 2 to illustrate the system's processes and information flow.
- Analyzed system requirements and translated them into functional website features.
